

# COMPRESSED COCONUT SHELL ACTIVATED CARBON

cost-effective

ORGANIC MATTER

RUST

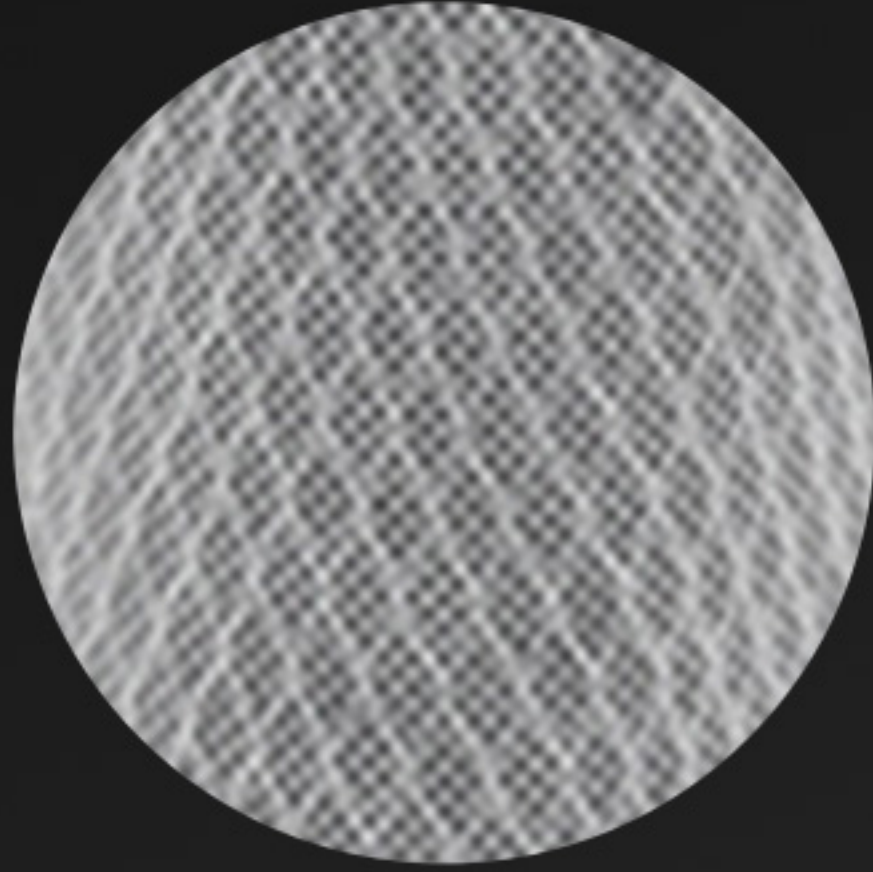

HEAVY METAL

The principle of physical adsorption  
Absorb different colors and odors in water

# PRODUCT DETAILS

## HONEYCOMB FILTER

The material has a large number of microporous pore structure, which makes the activated carbon have excellent adsorption capacity

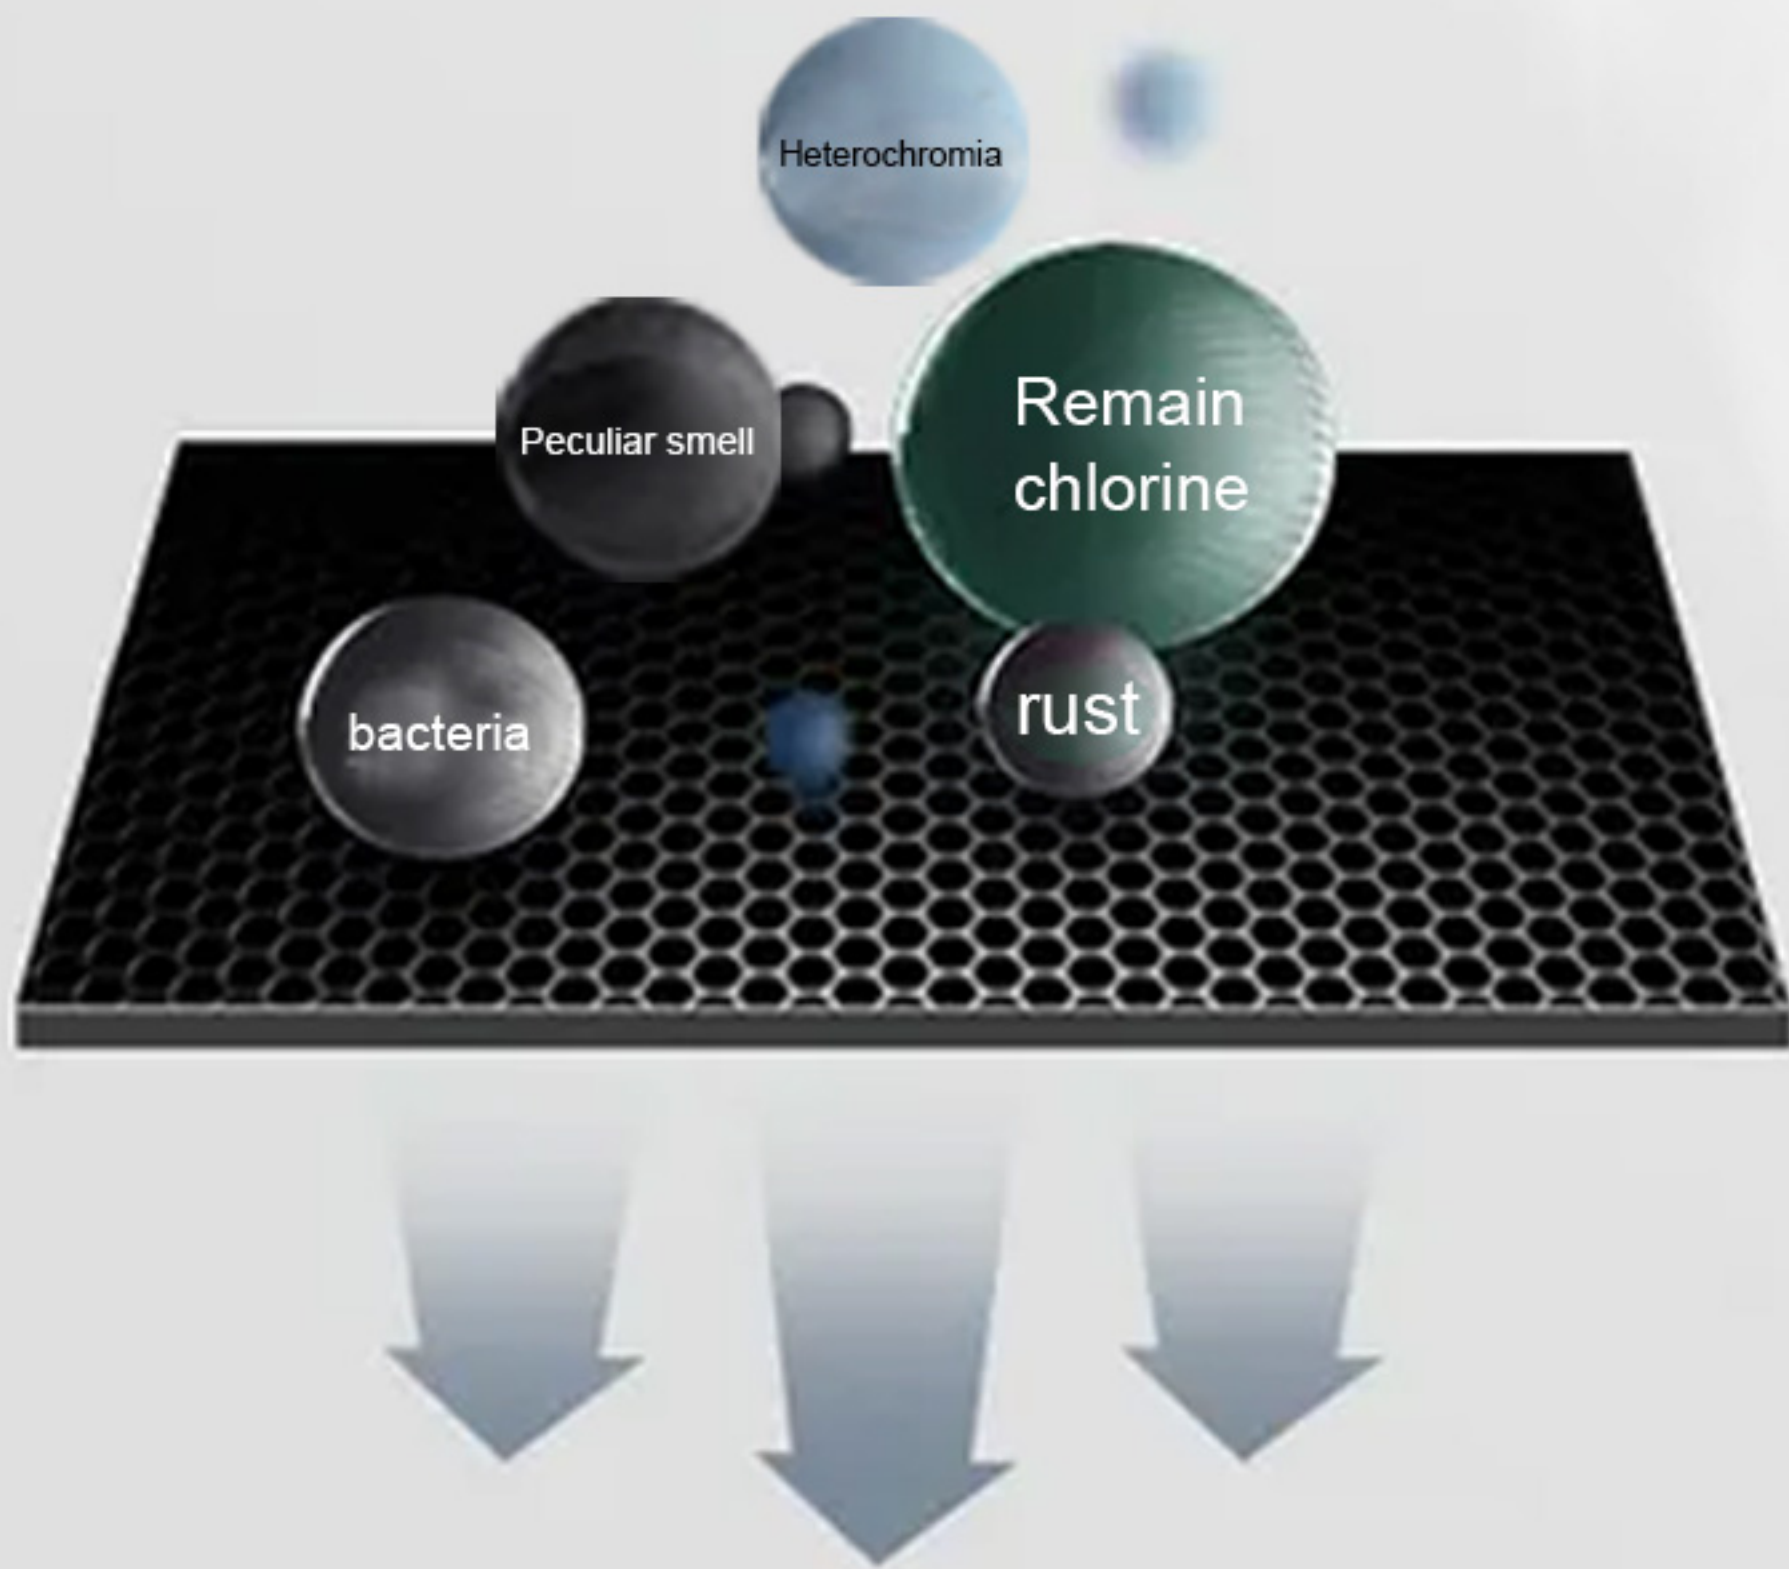

## FOOD GRADE RUBBER PAD

Good resilience and high sealing performance  
Suitable for sealing gasket

## HIGH QUALITY NUTSHELL CARBON

Remove harmful substances to improve taste

# COIR COMPRESSION ACTIVATED CARBON

Large flow, no secondary pollution

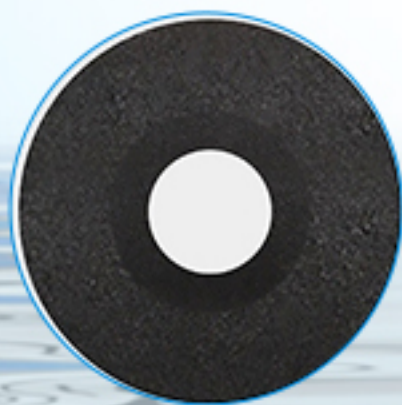

## SEALING RUBBER RING

Both ports have sealing rings,  
Stable and not easy to drop toner

## GRID SHELL

Adopt chemical resistance,  
Heat-resistant polymer materials

## COMPRESSED CARBON

The principle of physical adsorption  
Absorb different colors and odors in water

# PRODUCT PARAMETERS

Product Name : Activated carbon core

Product Size : 500\*70mm

Standard Accuracy : 1-5Micron

Maximum Temperature : 4-45C°

Maximum Pressure : 0.4MPa

Product Flow : 360L/H
