

CENTRAL WATER PURIFIER

High-purity physical filtration, high-efficiency filtration of harmful chemicals such as sediment, bacteria, colloids, rust, suspended solids, algae and macromolecular organic substances in raw water, retaining trace elements and minerals beneficial to the human body, and purifying water quality can be directly consumed .

EFFECTIVE FILTERING

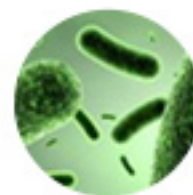

Filter out
impurities

Filter out rust

Filter out
the sediment

Filter out
bacteria

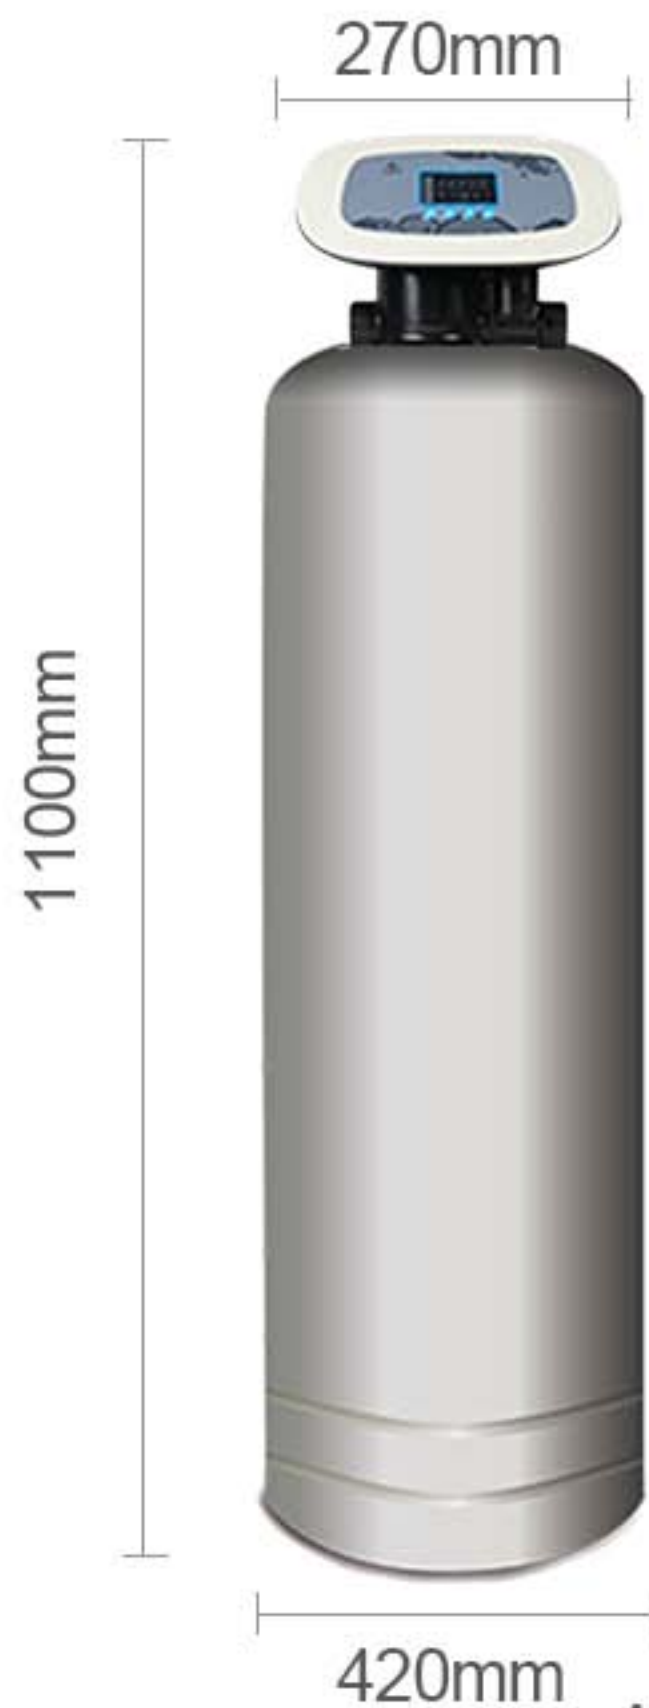

Filter out
residual chlorine

Filter out odor

PRODUCT PARAMETERS

Product Model : V8

Ambient Temperature : 5°C-45°C

Applicable Water Pressure : 0.1-0.4MPa

Filtration Accuracy : 0.01um

Initial Flow : 2000L/H

Dimesions(mm) : 420x270x1100mm

Filtering Method : Pure physical filtering

Working Pressure : 0.1-0.4MPa

Shell Material : Food grade 304 stainless steel
